

SUZUKI GSX1250S 2007-2010 WINDSCREEN TRANSFER NOTE

Factory screens have Rectangle holes to mount cover screen. Zero Gravity's screen omits these holes.

Factory Windscreen

Factory cover screen is not transferred to Zero Gravity windscreen. Factory transferred parts are the Well Nuts and screws. If factory Well Nuts are deformed (as shown right) you may want to change them out with our ZG Well Nuts kit part **#32-111**.

ZG screens DON'T have Rectangle holes to mount cover screen. So cover screen is omitted.

Zero Gravity Windscreen

Old Factory Well Nut

New ZG Well Nut

Warning: Forcing a used, deformed Well Nut into a windscreen hole may result in cracking the windscreen. ZG recommends replacing old Well Nuts if they cannot be easily inserted into the mounting hole.
